Terminal Quantity:

2 and 6

Terminal Type:

Binding post

Board Material:

Any acceptable

Width:

1.812 inches

Thickness:

0.312 inches

Length:

1.938 inches

Mounting Method:

Bolt

Component Quantity:

4

Component Controlling Agency:

Frequency engineering laboratories a division of harvard industries inc

Component Name:

Fixed composition resistor, fixed film resistor

Component Identifying Number:

K663270029 drawing no.

Assembly Construction Method:

Mounted on printed circuit board

Electrical Connection Method:

Parallel and series

Component Relationship:

Matched for resultant resistance

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T172-f
