Adjustable Resistor - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/5905-00-105-8646

# Tempurature Coefficient Of Resistance In Ppm Per Deg Celsius:

-20.0 to 20.0

#### **Electrical Resistance:**

1.000 ohms

# **Resistance Tolerance In Percent:**

-10.000 to 10.000

### Ambient Tempurature In Deg Celsius At Full Rated Power:

#### 40.0

#### Ambient Tempurature In Deg Celsius At Zero Percent Rated Power:

300.0

#### Tempurature Range Of Tempurature Coefficient In Deg Celsius:

-55.0/+300.0

#### **Inclosure Method:**

Encapsulated

#### Terminal Type:

Tab, solder lug

# **Reactance Characteristic:**

Noninductive

# **Reliability Indicator:**

Not established

#### **Terminal Length:**

0.500 inches

## Body Diameter:

0.500 inches

## **Body Length:**

4.000 inches

#### **Power Dissipation Rating In Watts:**

15.000 free air

#### **Terminal Width:**

0.250 inches

#### Style Designator:

Radial terminal each end

#### Shelf Life:

N/a

#### Unit Of Measure:

---

#### Demilitarization:

No

#### Fiig:

A001a0
