Inductive Wire Wound Fixed Resistor - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/5905-00-131-7880

Floatrical Paciatamas
Electrical Resistance: 1.500 kilohms
Resistance Tolerance In Percent:
-5.000 to 5.000
Ambient Tempurature In Deg Celsius At Full Rated Power:
40.0
Ambient Tempurature In Deg Celsius At Zero Percent Rated Power:
340.0
Inclosure Method:
Encapsulated Torminal Type:
Terminal Type:
Tab, solder lug
Reliability Indicator:
Not established
Terminal Length:
0.344 inches
Body Diameter:
Between 0.374 inches and 0.406 inches
Body Length:
Between 0.734 inches and 0.766 inches
Power Dissipation Rating In Watts:
3.000 free air
Terminal Width:
Between 0.109 inches and 0.141 inches
Cubic Measure (non-core):
0.099 cubic inches
Unpackaged Unit Weight:
8.0 grams
Style Designator:
Radial terminal each end
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A001a0
