Terminal Quantity:

9

Terminal Type:

Wire lead

Component Quantity:

3

Mounting Configuration:

Four holes irregularly spaced

Component Controlling Agency:

General electric co

Component Name:

Variable wire wound resistor

Component Identifying Number:

5005-51+02 part no. And 5005-51+01 part no.

Assembly Construction Method:

Mounted on plate

Component Relationship:

Not matched

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:
