Adjustable Resistor - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/5905-00-171-0188

Townwesting Coefficient Of Desigtance In Daw Day Day Coloins
Tempurature Coefficient Of Resistance In Ppm Per Deg Celsius:
-260.0 to 260.0
Electrical Resistance:
18.000 kilohms
Resistance Tolerance In Percent:
-5.000 to 5.000
Ambient Tempurature In Deg Celsius At Full Rated Power:
25.0
Ambient Tempurature In Deg Celsius At Zero Percent Rated Power:
350.0
Tempurature Range Of Tempurature Coefficient In Deg Celsius:
-55.0/+125.0
Inclosure Method:
Encapsulated
Terminal Type:
Tab, solder lug
Reactance Characteristic:
Inductive
Reliability Indicator:
Not established
Terminal Length:
0.560 inches
Body Diameter:
1.120 inches
Body Length:
10.500 inches
Power Dissipation Rating In Watts:
225.000 free air
Terminal Width:
0.310 inches
Style Designator:
Radial terminal each end
Shelf Life:
N/a
Unit Of Measure:

Demilitarization:
No
Fiig:
A001a0
