Reliability Indicator:

Not established

Temperature Points For Resistance Readings At Zero Power:

60.0 degrees celsius 4th resistance-temperature point

Zero Power Resistance At Specificationified Temp:

14.5 kilohms 2nd resistance-temperature point

Resistance Tolerance At A Specificationified Temperature In Percent:

-15.0/+15.0 all resistance-temperature points

Inclosure Type:

Encapsulated

Zero Power Resistance:

5.000 kilohms

Terminal Type And Quantity:

2 threaded stud

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A086a0
