Reliability Indicator:
Not established
Tempurature Points For Resistance Readings At Zero Power:
60.0 degrees celsius 4th resistance-temperature point
Zero Power Resistance At Specificationified Temp:
14.5 kilohms 2nd resistance-temperature point
Resistance Tolerance At A Specificationified Tempurature In Percent:
-15.0/+15.0 all resistance-temperature points
Inclosure Type:
Encapsulated
Zero Power Resistance:
5.000 kilohms
Terminal Type And Quantity:
2 threaded stud
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A086a0
