| Width:                        |
|-------------------------------|
| 4.562 inches                  |
| Thickness:                    |
| 0.500 inches                  |
| Length:                       |
| 7.000 inches                  |
| Component Quantity:           |
| 10                            |
| Mounting Configuration:       |
| Connector mtd                 |
| Assembly Construction Method: |
| Mounted on terminal board     |
| Shelf Life:                   |
| N/a                           |
| Unit Of Measure:              |
|                               |
| Demilitarization:             |
| No                            |
| Fiig:                         |
| T172-f                        |
|                               |
|                               |
