## NSN 5905-00-258-7687

Inductive Wire Wound Fixed Resistor - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/5905-00-258-7687

3
Tempurature Coefficient Of Resistance In Ppm Per Deg Celsius:
-50.0 to 50.0
Electrical Resistance:
75.000 ohms
Resistance Tolerance In Percent:
-5.000 to 5.000
Ambient Tempurature In Deg Celsius At Full Rated Power:
Not rated
Ambient Tempurature In Deg Celsius At Zero Percent Rated Power:
Not rated
Inclosure Method:
Encapsulated
Terminal Type:
Tab, solder lug
Reliability Indicator:
Not established
Body Diameter:
Between 0.302 inches and 0.322 inches
Body Length:
Between 0.865 inches and 0.885 inches
Power Dissipation Rating In Watts:
5.000 free air
Terminal Width:
Between 0.177 inches and 0.197 inches
Cubic Measure (non-core):
0.072 cubic inches
Style Designator:
Radial terminal each end
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A001a0
