Board Material:

Glass, epoxy

Width:

Between 4.500 inches and 5.100 inches

Thickness:

0.422 inches

Length:

Between 12.520 inches and 13.120 inches

Mounting Method:

Printed circuit terminal

Component Quantity:

4

Component Name:

Fixed composition resistor; variable resistor

Assembly Construction Method:

Mounted on printed circuit board

Component Relationship:

Not matched

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T172-f
