Board Material:

Any acceptable

Width:

4.800 inches

Thickness:

0.063 inches

Length:

12.820 inches

Mounting Method:

Printed circuit terminal

Component Quantity:

14

Component Controlling Agency:

Edo corporation government products division

Component Name:

Fixed wire wound resistor

Component Identifying Number:

65057-1 part no.

Assembly Construction Method:

Mounted on printed circuit board

Component Relationship:

Not matched

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T172-f
