Reliability Indicator:

Not established

Temperature Points For Resistance Readings At Zero Power:

0.0 degrees celsius 2nd resistance-temperature point

Zero Power Resistance At Specificationified Temp:

9.8 kilohms 1st resistance-temperature point

Resistance Tolerance At A Specificationified Tempurature In Percent:

-5.0/+5.0 2nd resistance-temperature point

Inclosure Type:

Encapsulated

Zero Power Resistance:

1.000 kilohms

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A086a0
