Reliability Indicator:

Not established

Temperature Points For Resistance Readings At Zero Power:

70.0 degrees celsius 4th resistance-temperature point

Zero Power Resistance At Specificationified Temp:

19.5 kilohms 2nd resistance-temperature point

Resistance Tolerance At A Specificationified Tempurature In Percent:

-10.0/+10.0 all resistance-temperature points

Inclosure Type:

Encapsulated

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A086a0
