**Reliability Indicator:**

Not established

**Temperature Points For Resistance Readings At Zero Power:**

50.0 degrees celsius 1st resistance-temperature point

**Zero Power Resistance At Specificationified Temp:**

9.6 kilohms 2nd resistance-temperature point

**Resistance Tolerance At A Specificationified Temperature In Percent:**

-10.0/+10.0 all resistance-temperature points

**Inclosure Type:**

Encapsulated

**Zero Power Resistance:**

100.000 kilohms

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A086a0
