Nonprecision Nonwire Wound Variable Resistor - Page 1 of 2

View Online at https://aerobasegroup.com/nsn/5905-00-833-2877

# Section Quantity:

2

Body Style:

Cylindrical bushing mounted

# **Reliability Indicator:**

Not established

#### **Overall Length:**

2.125 inches

#### Body Diameter:

1.156 inches

Shaft Diameter:

Between 0.248 inches and 0.250 inches

Shaft Length:

0.875 inches

#### Mounting Bushing Length:

# 0.500 inches

**Body Length:** 

1.250 inches

#### **Overall Diameter:**

1.484 inches

#### Shaft Style:

Round, slotted

#### Actuator Type:

Single shaft

## Effective Electrical Rotation In Deg Angular Rotation:

312.0

## Maximum Starting Torque:

8.00 inch-ounces

## Maximum Stop Torque:

192.00 inch-ounces

## Nonturn Device Location:

At 9 oclock

#### **Nonturn Device Radius:**

0.531 inches

## Mechanical Backlash In Deg Angular Rotation:

3.0

# Screw Thread Diameter:

0.375 inches

# Screw Thread Series Designator:

Unef

## Screw Thready Qty Per Inch (tpi):

32.0

| Terminal Location:                                                          |
|-----------------------------------------------------------------------------|
| Radially positioned over less than half the circumference                   |
| Mounting Method:                                                            |
| Locking bushing                                                             |
| Electrical Resistance Per Section:                                          |
| 5.000 percent, rated amperes c and better finish                            |
| Rotary Actuator Travel In Angular Deg:                                      |
| 312.0                                                                       |
| Ambient Tempurature In Deg Celsius Per Section At Zero Percent Rated Power: |
| 120.0 single section                                                        |
| Power Dissipation Rating Per Section In Watts:                              |
| 2.25 heat sink single section                                               |
| Resistance Tolerance Per Section In Percent:                                |
| -10.0/+10.0 2nd section                                                     |
| Actuator Travel Control Feature:                                            |
| Stops                                                                       |
| Ambient Tempurature In Deg Celsius Per Section At Full Rated Power:         |
| 70.0 single section                                                         |
| Standard Taper Curve Per Section:                                           |
| A single section                                                            |
| Special Features:                                                           |
| 0.500 inch long bushing                                                     |
| Terminal Type And Quantity:                                                 |
| 6 tab, solder lug                                                           |
| Shelf Life:                                                                 |
| N/a                                                                         |
| Unit Of Measure:                                                            |
|                                                                             |
| Demilitarization:                                                           |
| No                                                                          |
| Fiig:                                                                       |
| A002a0                                                                      |
|                                                                             |
|                                                                             |
