Reliability Indicator:

Not established

Temperature Points For Resistance Readings At Zero Power:

68.0 degrees fahrenheit all resistance-temperature points

Zero Power Resistance At Specificationified Temp:

50.0 kilohms all resistance-temperature points

Resistance Tolerance At A Specificationified Temperature In Percent:

-10.0/+10.0 all resistance-temperature points

Maximum Current Rating:

2.24 milliamperes

Inclosure Type:

Encapsulated

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A086a0
