| Section Quantity:                              |          |
| 1  |          |
| Shaft Diameter:                                |          |
| 0.250 inches                                   |          |
| Shaft Length:                                  |          |
| 0.437 inches                                   |          |
| Shaft Style:                                   |          |
| Round  |          |
| Actuator Type:                                 |          |
| Single shaft                                   |          |
| Nonturn Device Location:                       |          |
| At 9 oclock                                    |          |
| Nonturn Device Radius:                         |          |
| 0.531 inches                                   |          |
| Screw Thread Diameter:                         |          |
| 0.375 inches                                   |          |
| Screw Thread Series Designator:                |          |
| Unef   |          |
| Screw Thready Qty Per Inch (tpi):              |          |
| 32.0   |          |
| Mounting Method:                               |          |
| Standard bushing                               |          |
| Electrical Resistance Per Section:             |          |
| 1.000 gallons per minute c and better flooring | ng       |
| Power Dissipation Rating Per Section In        | Watts:   |
| 2.3 7th secondary quality                      |          |
| Resistance Tolerance Per Section In Per        | cent:    |
| -20.0/+20.0 single section                     |          |
| Shelf Life:                                    |          |
| N/a  |          |
| Unit Of Measure:                               |          |
|  |          |
| Demilitarization:                              |          |
| No   |          |
| Fiig:  |          |
| A002a0   |          |
|  |          |
