Reliability Indicator:

Not established

Temperature Points For Resistance Readings At Zero Power:

85.0 degrees celsius 1st resistance-temperature point

Zero Power Resistance At Specificationified Temp:

4.9 kilohms 1st resistance-temperature point

Resistance Tolerance At A Specificationified Tempurature In Percent:

-15.0/+15.0 all resistance-temperature points

Inclosure Type:

Encapsulated

Zero Power Resistance:

50.000 kilohms

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A086a0
