Terminal Quantity:

4

Terminal Type:

Wire lead

Component Quantity:

2

Component Controlling Agency:

Gamma scientific incorporated

Component Name:

Variable wirewound resistors

Component Identifying Number:

13312 drawing no.

Assembly Construction Method:

Mounted between u-brackets

Component Relationship:

Matched for resultant resistance

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T172-f
