Terminal Quantity:

62

Terminal Type:

Wire lead

Mounting Method:

Solder and printed circuit terminal

Component Quantity:

31

Component Controlling Agency:

Lockheed-california co.

Component Name:

Fixed film resistor

Component Identifying Number:

Rnc65h3160fm part no. And rnc65h2001fm part no. And c-1508 part no. And c-417-m part no. And rlr202002fm part no. And rlr07c1002fm part no. And rlr07c6190fm part no. And rlr07c1001fm part no.

Assembly Construction Method:

Leads soldered to terminals

Component Relationship:

Matched for resultant resistance

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T172-f
