Wire Wound Fixed Resistor - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/5905-01-231-7855

## Tempurature Coefficient Of Resistance In Ppm Per Deg Celsius:

-20.0 to 20.0

**Electrical Resistance:** 

2.210 kilohms

**Resistance Tolerance In Percent:** 

-0.010 to 0.010

Ambient Tempurature In Deg Celsius At Full Rated Power:

#### 125.0

Ambient Tempurature In Deg Celsius At Zero Percent Rated Power:

145.0

**Inclosure Method:** 

Encased

**Terminal Type:** 

Wire lead

**Reactance Characteristic:** 

## Noninductive

Reliability Indicator:

Not established

# Terminal Length:

1.000 inches

## **Body Diameter:**

0.250 inches

## Body Length:

0.340 inches

## **Power Dissipation Rating In Watts:**

0.125 free air

#### Err Default:

0.025 inches

#### Style Designator:

Axial terminal each end

#### Shelf Life:

N/a

## Unit Of Measure:

---

## Demilitarization:

No

# Fiig:

A001a0
