**Terminal Quantity:**

4

**Terminal Type:**

Wire lead

**Mounting Method:**

Potted

**Component Quantity:**

2

**Mounting Configuration:**

Encapsulated in epoxy 0.020 in. Mim. From surface; resistors spaced 0.250 c to bottom/top edge, 0.140 in. C to side edges

**Component Controlling Agency:**

General electric

**Assembly Construction Method:**

Encased in potting compound

**Component Relationship:**

Not matched

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

T172-f
