Terminal Quantity:

4 and 8

Terminal Type:

Wire lead and wire lead

Mounting Method:

Solder

Component Quantity:

2 and 4

Component Controlling Agency:

Westinghouse electric corp

Component Name:

Fixed wire wound resistor; resistor thermal

Component Identifying Number:

Rwr84s2801fr part no. And 142c924h01 part no.

Assembly Construction Method:

Mounted on printed circuit board

Component Relationship:

Not matched

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T172-f
