Section Quantity:

1

Body Style:

Cylindrical servo mounted

Reliability Indicator:

Not established

Shaft Style:

Round, undercut

Shaft Bearing Type:

Ball

Actuator Type:

Single shaft

Fragility Factor:

Moderately rugged

Mounting Facility Quantity:

4

Terminal Location:

Rear end

Mounting Method:

Clamp ring and unthreaded hole

Features Provided:

Humidity proof

Special Features:

Servo mounted resistor is mounted in a tubular housing which also houses a shaft extension mounted by pin through the resistor shaft; shaft extension is slotted at end; 4 mounting holes at base of housing at 90 degree angles

Terminal Type And Quantity:

3 wire lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A002a0
