Terminal Quantity:

4

Terminal Type:

Wire lead

Mounting Method:

Solder

Component Quantity:

2

Component Controlling Agency:

Ward leonard electric co.

Component Name:

Fixed wirewound resistor

Component Identifying Number:

23302 drawing no.

Assembly Construction Method:

Terminals soldered together

Electrical Connection Method:

Series

Component Relationship:

Connected matched pair

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T172-f
