Terminal Quantity:

2

Terminal Type:

Wire lead

Overall Length:

1.575 inches

Overall Height:

0.236 inches

Overall Width:

0.197 inches

Cubic Measure:

0.073 cubic inches

Usage Design:

Protect against repeated high voltage transients and surges such as lightning, switching surges, and noise spikes

Element Material:

Oxide

Resistance Rating At Specificationified Voltage:

470.0 ohms at 385.0 vdc and 300.0 vac; ratings at allowable voltage

Power Dissipation Rating In Watts:

0.100

Functional Description:

Circuit clamping protection in either direction

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T172-d
