Section Quantity:

1

Reliability Indicator:

Established

Reliability Failure Rate Level In Percent:

0.010

Body Length:

0.250 inches

Body Width:

0.250 inches

Electrical Resistance Per Section:

1000.0 ohms single section

Power Dissipation Rating Per Section In Watts:

0.25 free air single section

Terminal Type And Quantity:

3 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A002a0
