**Element Material:**

Any acceptable

**Resistance Temperature Rating:**

125.0 degrees celsius

**Special Features:**

Insulation resistance 10, 000 megohms ; wattage 3.6; continuous operating voltage 10, 000; solderable leads; load life 1, 000 hours; temperature coefficient; continuous duty

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T172-d
