Element Material:

Any acceptable

Resistance Tempurature Rating:

125.0 degrees celsius

Special Features:

Insulation resistance 10, 000 megohms ; wattage 3.6; continuous operating voltage 10, 000; solderable leads; load life 1, 000 hours; temperature coefficient; continuous duty

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T172-d
