Overall Height:

Between 2.700 inches and 3.000 inches

Body Length:

1.600 inches

Maximum Operating Temp:

300.0 degrees fahrenheit

Thermal Time Constant In Seconds:

5.0

Temperature Points For Resistance Readings At Zero Power:

72.0 degrees fahrenheit 2nd resistance-temperature point

End Application:

M113a3; tracked light armoured vehicle (tlav)

Inclosure Type:

Hermetically sealed

Width Across Flats:

0.879 inches

Zero Power Resistance Tolerance In Percent At Reference Temp:

-0.6/+0.6

Special Features:

Sensor, engine coolant temperature

Style Designator:

Bead in stud

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A086a0
