Mounting Method:

Holes

End Application:

C-17a support equipment

Component Quantity:

10 and 6 and 2 and 2 and 1 and 2

Component Controlling Agency:

Military specifications promulgated by military

Component Name:

Resistor, fixed, wire wound, noninductive; resistor, fixed, wire wound, inductive; resistor, fixed, wire wound, noninductive; resistor, fixed, wire wound, inductive; resistor, fixed, wire wound, inductive; resistor, fixed, wire wound, noninductive

Component Identifying Number:

Rer50f64r9p part no. And rer65f1270p part no. And rer40f4640p part no. And rer60f12r7p part no. And rer60f22r1p part no. And rer50f52r3p part no.

Assembly Construction Method:

Mounted on plate

Component Relationship:

Not matched

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T172-f
