Wire Wound Fixed Resistor - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/5905-01-541-6837

Tempurature Coefficient Of Resistance In Ppm Per Deg Celsius:
-90.0 to 90.0
Electrical Resistance:
15.000 ohms
Resistance Tolerance In Percent:
-1.000 to 1.000
Inclosure Method:
Encapsulated
Terminal Type:
Eyelet
Reliability Indicator:
Not established
End Application:
Marcom switch drawer, marcom ivcs
Product Name:
Inavy: resistor, 10hm; mfr: cmc series chassis mount wirewound resistor
Special Features:
Power: 25 watts; dialectric strength: 1000 vac; operating temp: m55.0/p275.0 degrees c; aluminum housing
Style Designator:
Radial terminal each end
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A001a0
