Terminal Surface Treatment:

Tin and copper

Body Outside Diameter:

0.400 inches

Body Width:

0.120 inches

Zero Power Resistance:

0.25 ohms

Product Name:

Polyswitch overcurrent protection device

Special Features:

Current ratings at 20 degrees celsius is 0.75amps hold to 1.50amps trip, insulating material is cured flame retardant epoxy polymer, lead material 24awg tin plated copper; 72 volt max; current 40 amp max

Style Designator:

Disk

Terminal Type And Quantity:

2 wire lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A086a0
