End Application:

Resistor, fixed, film

Product Name:

Type tg low tc precision high voltage resistors

Special Features:

Temperature coefficient: 25ppm degrees celcius form -55 to 125 degrees celcius; load life stability of 0.25 % per 1, 000 hours at 125 degrees celcius; the low temperature coefficient minimizes the self-drift due to power dissipaion warm-up

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A001a0
