Body Length:

9.9 millimeters

Body Width:

7.6 millimeters

Body Height:

0.9 millimeters

Terminal Width:

7.6 millimeters

Product Name:

Dual-in-line resistor networks

Special Features:

Isolated, bussed or ttl-terminator circuits; molded case construction; thick film resistive elements; reflow solderable; compatible with automatic surface mounting equipment; reduces total assembly costs; lead-free version is rohs compliant

Style Designator:

Terminals two edges

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A001a0
