Body Length:

490.0 millimeters

Body Width:

150.0 millimeters

Body Height:

260.0 millimeters

End Application:

Terminal doppler weather radar (tdwr)

Product Name:

Gegeneration resistor

Special Features:

Prevents voltage spikes at the servo amps due to regeneration from motors during motor braking; resistance = 15 ohms, rated power = 2000 watts; component required as a part of the brushless motors modification which replaces the the high failure rate existing brushed motors

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A502h0
