Resistance Tolerance In Percent:

-5.0 to 5.0

Body Diameter:

0.150 inches

Body Length:

0.406 inches

Product Name:

Carbon composition resistor

Special Features:

Molded insulation os high dielectric strength; terminals are solder-coated copper; body is molded phenolic; 100000 ohmic value; wattage 0.50; max voltage 350; low noise; dissipate heat rapidly and high temp stability

Style Designator:

Axial terminal each end

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A001a0
