Resistance Tolerance In Percent:

-5.0 to 5.0

Ambient Temperature In Deg Celsius At Full Rated Power:

275.0

Ambient Temperature In Deg Celsius At Zero Percent Rated Power:

350.0

Inclosure Method:

Encased

Terminal Type:

Pin

Reliability Indicator:

Not established

Body Diameter:

0.313 inches

Body Length:

2.125 inches

Power Dissipation Rating In Watts:

12.0 free air

Mounting Hole Size:

0.078 inches

Product Name:

Resistor, printed circuit board mount, silicone coated

Special Features:

Dual-watt: 12/10; inductive; core: steatite ceramic; coating: silicone; dielectric withstanding voltage: 500vac; terminals: 0.025 x 0.035
pre-tinned rectangular pins

Style Designator:

Axial terminal each end

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A001a0
