Inductive Wire Wound Fixed Resistor - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/5905-01-624-8335

Tempurature Coefficient Of Resistance In Ppm Per Deg Celsius:
-300.0 to 300.0
Electrical Resistance:
2.800 ohms
Resistance Tolerance In Percent:
-10.000 to 10.000
Inclosure Method:
Encapsulated
Terminal Type:
Clamp
Reactance Characteristic:
Inductive
Reliability Indicator:
Not established
Body Diameter:
Between 2.375 inches and 2.625 inches
Body Length:
Between 17.812 inches and 18.938 inches
End Application:
C5m amp se
Product Name:
Powr-rib pfe5k edgewound resistor
Special Features:
Rohs compliant, similar to 5905013438311 difference is lead free plating on terminals
Style Designator:
Axial terminal each end
Shelf Life:
N/a
Unit Of Measure:

Demilitarization:
No
Fiig:
A001a0
