Terminal Type:

Wire lead

Body Diameter:

0.343 inches

Body Length:

0.937 inches

Special Features:

Operating temperature-max: 275 celsius; rated power dissipation (p): 5 watt; rated temperature: 25 celsius; resistance: 1330 ohm; tolerance: 1 percent; working voltage: 460; coating: silicone-ceramic; core: ceramic; terminals: solder-coated copper clad axial.

Style Designator:

Axial terminal each end

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A001a0
