**Terminal Type:**

Wire lead

**Body Diameter:**

0.343 inches

**Body Length:**

0.937 inches

**Special Features:**

Operating temperature-max: 275 celsius; rated power dissipation (p): 5 watt; rated temperature: 25 celsius; resistance: 1330 ohm; tolerance: 1 percent; working voltage: 460; coating: silicone-ceramic; core: ceramic; terminals: solder-coated copper clad axial.

**Style Designator:**

Axial terminal each end

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A001a0
