Wire Wound Fixed Resistor - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/5905-01-641-2766

Terminal Type:
Wire lead
Body Diameter:
0.343 inches
Body Length:
0.937 inches
Special Features:
Operating temperature-max: 275 celsius; rated power dissipation (p): 5 watt; rated temperature: 25 celsius; resistance: 1330 ohm;
tolerance: 1 percent; working voltage: 460; coating: silicone-ceramic; core: ceramic; terminals: solder-coated copper clad axial.
Style Designator:
Axial terminal each end
Shelf Life:
N/a
Unit Of Measure:

Demilitarization:
No
Fiig:
A001a0
