## NSN 5905-01-654-6817

Film Fixed Resistor - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/5905-01-654-6817

Tempurature Coefficient Of Resistance In Ppm Per Deg Celsius:
-100.0 to 100.0
Electrical Resistance:
392.0 kilohms
Resistance Tolerance In Percent:
-1.0 to 1.0
Ambient Tempurature In Deg Celsius At Full Rated Power:
70.0
Ambient Tempurature In Deg Celsius At Zero Percent Rated Power:
150.0
Inclosure Method:
Encased
Terminal Type:
Wrap around
Reliability Indicator:
Not established
Body Length:
3.20 millimeters
Body Width:
1.55 millimeters
Body Height:
0.46 millimeters
Power Dissipation Rating In Watts:
0.25 heat sink
0.25 heat sink  End Application:
End Application:
End Application: Control stick assembly
End Application: Control stick assembly Product Name:
End Application: Control stick assembly Product Name: Resistor, chip
End Application: Control stick assembly Product Name: Resistor, chip Special Features:
End Application: Control stick assembly  Product Name: Resistor, chip  Special Features: Termination finish is sn60 solder over nickel barrier; product designation is thick film on alumina
End Application: Control stick assembly  Product Name: Resistor, chip  Special Features: Termination finish is sn60 solder over nickel barrier; product designation is thick film on alumina  Style Designator:
End Application: Control stick assembly Product Name: Resistor, chip Special Features: Termination finish is sn60 solder over nickel barrier; product designation is thick film on alumina Style Designator: Termination pad each end
End Application: Control stick assembly  Product Name: Resistor, chip  Special Features: Termination finish is sn60 solder over nickel barrier; product designation is thick film on alumina  Style Designator: Termination pad each end  Shelf Life:
End Application: Control stick assembly  Product Name: Resistor, chip  Special Features: Termination finish is sn60 solder over nickel barrier; product designation is thick film on alumina  Style Designator: Termination pad each end  Shelf Life: N/a
End Application: Control stick assembly  Product Name: Resistor, chip  Special Features: Termination finish is sn60 solder over nickel barrier; product designation is thick film on alumina  Style Designator: Termination pad each end  Shelf Life: N/a
End Application: Control stick assembly  Product Name: Resistor, chip  Special Features: Termination finish is sn60 solder over nickel barrier; product designation is thick film on alumina  Style Designator: Termination pad each end  Shelf Life: N/a  Unit Of Measure:
End Application: Control stick assembly Product Name: Resistor, chip Special Features: Termination finish is sn60 solder over nickel barrier; product designation is thick film on alumina Style Designator: Termination pad each end Shelf Life: N/a Unit Of Measure: Demilitarization:
