Reliability Indicator:

Not established

Terminal Length:

1.500 inches

Body Length:

2.062 inches

Features Provided:

Hermetically sealed case

Capacitance Value Per Section:

0.100 microfarads single section

Nonderated Operating Temp:

Unable to decode and 85.0 degrees celsius

Tolerance Range Per Section:

-20.00 to 20.00 percent single section

Case Material:

Metal

Dissipation Factor At Reference Temperature In Percent:

1.0000

Terminal Surface Treatment:

Solder

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A010b0
