Reliability Indicator:

Not established

Body Length:

2.160 inches

Body Width:

1.310 inches

Schematic Diagram Designator:

No common or grounded electrode (s)

Capacitance Value Per Section:

1.000 microfarads single section

Nonderated Operating Temp:

Unable to decode and 85.0 degrees celsius

Tolerance Range Per Section:

-10.00 to 10.00 percent single section

Power Factor At Reference Temperature In Percent:

0.6000

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A010b0
