Mounting Method:

Terminal

Capacitance Value:

54.0 picofarads

Capacitance Tolerance In Percent:

-1.0 to 1.0

Component Quantity:

2

Component Controlling Agency:

Army electronic command

Component Name:

Fixed glass capacitor

Component Relationship:

Matched to each other

Working Voltage Rating:

500.0 volts

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T172-f
