Capacitor Assembly - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/5910-00-253-1740 **Terminal Quantity: Terminal Type:** Wire lead **Mounting Method:** Clamp ring **Capacitance Value:** 1.0 microfarads **Capacitance Tolerance:** -20.0/+20.0 microfarads **Capacitance Tolerance In Percent:** -20.0/+20.0 **Component Quantity: Mounting Configuration:** Four elongated mtg slots equally spaced 90 degrees c to c **Component Controlling Agency:** Cornell-dubilier electronics div of federal pacific elec co govt contractsdept **Component Name:** Fixed, paper dielectric capacitor **Component Identifying Number:** Mtx2wig20-20 part no. **Electrical Connection Method:** Parallel **Component Relationship:** Connected matched pair **Working Voltage Rating:** 200.0 volts **Criticality Code Justification:** Feat **Special Features:** Hwinged mtg ring w/saddle clamp for paired metal case capacitors, capacitor leads covered w/fiber glass tubing and glass laminated nipple cup, single flag type terminal sloder lug applied to paired leads Shelf Life: N/a **Unit Of Measure: Demilitarization:**
