Terminal Quantity:

6

Terminal Type:

Wire lead

Mounting Method:

Socket

Capacitance Value:

350.0 picofarads

Capacitance Tolerance:

-15.0/+75.0 picofarads

Component Quantity:

3

Component Controlling Agency:

Hamilton standard div

Component Name:

Fixed electrolytic capacitor

Component Identifying Number:

5e1560-01-0008 drawing no.

Working Voltage Rating:

25.0 volts

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T172-f
