| Body Style:                                                |
|------------------------------------------------------------|
| W/o mtg facilities, axial terminals                        |
| Reliability Indicator:                                     |
| Established                                                |
| Reliability Failure Rate Level In Percent:                 |
| 1.0000                                                     |
| Terminal Length:                                           |
| 1.500 inches                                               |
| Body Diameter:                                             |
| 0.312 inches                                               |
| Body Length:                                               |
| 1.047 inches                                               |
| Terminal Diameter:                                         |
| 0.025 inches                                               |
| Schematic Diagram Designator:                              |
| No common or grounded electrode (s)                        |
| Anode Type:                                                |
| Etched foil                                                |
| Electrical Polarization:                                   |
| Polarized                                                  |
| Features Provided:                                         |
| Hermetically sealed case                                   |
| Capacitance Value Per Section:                             |
| 4.000 microfarads single section                           |
| Nonderated Operating Temp:                                 |
| Between -55.0 degrees celsius and 85.0 degrees celsius     |
| Dc Leakage At Maximum Operating Temp:                      |
| 13.0 microamperes                                          |
| Nonderated Continuous Voltage Rating And Type Per Section: |
| 150.0 dc single section                                    |
| Tolerance Range Per Section:                               |
| -15.00/+30.00 percent single section                       |
| Case Material:                                             |
| Metal                                                      |
| Capacitive Electrode Material:                             |
| Tantalum                                                   |
| Dissipation Factor At Reference Tempurature In Percent:    |
| 15.0000                                                    |
| Dc Leakage At Reference Temp:                              |
| 2.000 microamperes                                         |
| Terminal Surface Treatment:                                |

Solder

## NSN 5910-00-531-9189

Electrolytic Fixed Capacitor - Page 2 of 2

| Case Insulation Material: |
|---------------------------|
|---------------------------|

Plastic

#### **Test Data Document:**

81349-mil-c-39006 specification (includes engineering type bulletins, brochures, etc., that reflect specification type data in specification format; excludes commercial catalogs, industry directories, and similar trade publications, reflecting general type data on certain environmental and performance requirements and test conditions that are shown as "typical", "average", "", etc.).

### **Terminal Type And Quantity:**

2 uninsulated wire lead

#### **Specification Data:**

81349-mil-c-39006/1 government specification

Shelf Life:

N/a

**Unit Of Measure:** 

--

**Demilitarization:** 

No

Fiig:

A010b0
