Terminal Quantity:

12

Terminal Type:

Wire lead

Mounting Method:

Holes

Capacitance Value:

3.0 microfarads

Capacitance Tolerance In Percent:

-10.0/+10.0

Component Quantity:

6

Component Controlling Agency:

Eldec corp

Component Name:

Fixed metallized capacitor

Component Identifying Number:

Ca22-01a part no.

Electrical Connection Method:

Parallel

Component Relationship:

Unconnected matched pair

Working Voltage Rating:

115.0 volts

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T172-f
